Skylativity@:Remedy, Gaps in EM theories

**True Physics of Light,
Beyond Relativity**
First Edition

Chapters

- Introduction
- Physics of Light and Electromagnetic Waves
- Postulates: Relativity Basics
- Limitations of Einstein's Theory of Relativity
- Simplified Lorentz's Transformation
- Applications of Skylativity® to the Space Age
- Universal Unified Field Theory
- Black Holes and the Infinite Universe
- Bridging Quantum Mechanics and Classical Mechanics

Customer's Review: Michael Spronz

First, the book is very well written and easy to read in the respect that it flows well and the material is presented in a way that it keeps the reader interested. The information is also presented in such a way that any reader, from those with little to basic understanding of the concepts to the more advanced reader, can follow the material and understand its concepts.

This book has the potential to be used as a text book, although it does not read like one - making it versatile enough to reach the non-text book audience... more

**True Physics of Light,
Beyond Relativity**
Second Edition

Chapters

- Introduction
- Physics of Light and Electromagnetic Waves
- Postulates: Relativity Basics
- Limitations of Einstein's Theory of Relativity
- Simplified Lorentz's Transformation
- Applications of Skylativity® to Space
- Universal Unified Field Theory
- Black Holes and the Infinite Universe
- Bridging Quantum Mechanics and Classical Mechanics
- Quark Structure of Atoms and the Origin of Matter

Customer's Review: Francis Ben, PhD, Jan '14

Shailesh's book tackles the difficulty of understanding light as an entity in physical science. It presents arguments (both in words and mathematical forms) that highlight the limitations of Albert Einstein's theory of relativity. It attempts to address the misconceptions a lot of people have about the attributes of light. The book is a move forward from the physics that 'everyday' people have come to encounter during their schooling days (assuming that they chose to study physics at upper secondary levels)...more

Paper: **Unique Concepts of Skylativity®**

**Unique Physics of Light,
and Astronomy**
Advance Information

Chapters

- Introduction to relativity
- Quantum Theory of Radiation
- Fundamentals of Skylativity®
- Beyond Einstein's Relativity
- Overview: Lorentz's Transformation
- Feynman's Fascinating Theory
- Applications of Skylativity® Theory
- Quantum Theory of Gravitation
- Evolution of Solar Systems
- New Physics of Black Holes
- Quantum Mechanics: Modern View
- Quark Structure of Nucleus
- Evolving Universe
- Space Exploration

Find answers to intriguing questions.

1. **What is light?: Quantum description**
2. **What gives color charge to quarks?**
3. **What is quantum entanglement?**
4. **How matter is created from energy?**
5. **Why galaxies move apart?**
6. **Why galaxies, stars & planets spins?**
7. **Scales of matter density in Universe?**
8. **Why Pulsars have strong magnetic fields and emit x-rays?**
9. **Why orientation of magnetic field is different from axis of rotation ?**
10. **Why no singularity inside black holes?**
11. **How dark matter is related to energy?**
